our secure administration area.

## EFFICIENCY & FLEXIBILITY

Our model is designed to be flexible and efficient.

We can give you back some of that precious time to concentrate on key operational decisions, as well as allowing you to focus on other business/departmental priorities.

## ACCURATE CANDIDATE SELECTION THRU' OUR UNIQUE TAGGING SYSTEM

*Which would you prefer?*

20 Candidate CVs that meet your general needs, taking an inordinate amount of time to review, of which few can be progressed to interview, or....

5 Candidate CVs that are a close or an exact match (on paper), taking you less time to review, of which, all can be progressed to interview.

Unlike some other agencies, Touch Aviations' recruiters do not rely on electronic searching as the only means of locating suitable candidates.

Together with technical aptitude & common sense, our unique tagging system enables us to be more selective and accurate in identifying & locating relevant candidate CVs that are a close (if not) exact match to your specific requirements.

Time is precious to any Senior and Human Resource Executive and Touch Aviation are mindful of how important reducing avoidable work is through the recruitment process.

Touch Aviation is a web based Recruitment Company, focused on servicing the global aviation industry.

## DYNAMIC CLIENT PARTNERSHIP

A long-term business relationship based on quality & service is important for us to achieve a dynamic client partnership. To this effect, our one-stop-shop approach is truly global in its application and provides you with a professional, responsive and flexible service.
